

LogTag North America

Software Validation Certificate

This certificate covers

LogTag Analyzer 3.2 release 8

The above software is available from <https://logtag.com/software/>.

This software has undergone extensive and thorough module and regression testing, which covers all software functions including installation, user interface, configuring recorders, downloading recorders and all data handling functions including data transfer.

All data values reported by this software have been verified to be correct and meet all published performance specifications.

This software has been tested for use on the following Microsoft operating systems with all service packs and critical updates installed up to February 27, 2025:-

- Windows 10 (32-bit/64-bit) release 1607 and later
- Windows 11 (64-bit) release 24H2
- Windows 11 LTSC (64-bit) release 24H2

Following operating system has not undergone full testing. It is generally expected to work, we recommend, however, that you perform your own validation testing prior to deployment in critical applications.

- Windows 10 LTSC (32-bit/64-bit)
