Smart Probe

Hassle-Free Compliance with a LogTag[®] Smart Probe

The LogTag[®] Smart Probe is the ultimate solution for uninterrupted temperature monitoring. Designed to simplify your calibration needs and provide effortless compliance, all while saving you time and money. Using a LogTag[®] Smart Probe ensures that you have uninterrupted, reliable, and accurate temperature monitoring while making compliance procedures a breeze.

PROTECTING PEOPLE, PRODUCTS AND BRANDS

Cost-Effective and Convenient

Say goodbye to the hassle of sending your temperature logger away for calibration to remain compliant. With the LogTag® Smart Probe, your calibration process becomes a breeze. By eliminating the need for downtime or additional hardware, our Smart Probe offers a cost-effective alternative to traditional logger calibration methods. Enjoy uninterrupted temperature monitoring without breaking the bank.

Simplify Your Calibration Process

Using a Smart Probe instead of typical temperature logger calibration processes is simple. Our plug-and-play hot-swappable design makes compliance required calibration a breeze.

Thanks to our handy reminder service, you are never without a Smart Probe when you need it. Once you receive your reminder, calibration takes three simple steps.

Step 1

Order your Smart Probes for each compatible temperature logger.

Step 2

When your Smart Probes arrive, unplug the current probe from your compatible temperature logger.

Step 3

Plug in your new Smart Probe.

That's it!

Enjoy hassle-free, continuous, and reliable temperature tracking at your convenience.

Easy Compliance Certificates

Maintaining compliance for temperature-sensitive product storage can be a daunting task. For businesses already using the LogTag® Smart Probe, compliance has become second nature. Our Smart Probe solution ensures continuous and accurate temperature monitoring, allowing you to effortlessly meet your compliance requirements without the stress associated with the typical logger calibration processes. With the Smart Probe, compliance is not just achievable; it's effortless.

When it's time to produce your compliance certificate, simply connect your temperature logger to LogTag® Analyzer with your Smart Probe connected to the logger. Click "Show Certificate" for the logger to get instant access to your Smart Probe compliance certificate in the adjacent tab.

LogTag Analyzer

The screenshot shows the LogTag Analyzer software interface. A 'Show Certificate' button is highlighted in the top navigation bar. The main window displays a 'Factory Certificate of Calibration' for a LogTag probe. The certificate includes the following information:

- Certificate No.:** CP100-0029001003
- Model number:** CP100
- Serial number:** 0029001003

The calibration points table is as follows:

Reference	Permitted Temperature Deviation	PASS/FAIL	Adjustment
57.3 °C	± 0.5 °C	PASS	N/A
25.6 °C	± 0.5 °C	PASS	N/A

Never Miss a Beat

Forget about keeping track of when to replace your Smart Probe. Our convenient reminder service takes care of it for you, ensuring you always have the Smart Probes you need when you need them.
